Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

The cited prior art taken alone or in combination does not fairly teaches the claimed invention of profiling a target application using dynamic probe class library (DPCL) instrumentation on an informational processor without the need for the source code or any recompiling or re-linking. Specifically, claims 1, 9 and 17 are directed to profiling a target application running on an informational processor with applying DPCL (Dynamic Probe Class Library) instrumentation. The DPCL instrumentation selects at least one function in the application and dynamically patches in calls to the appropriate performance-gathering interfaces and improves performance dynamically while avoiding bottleneck and write out data performance data without having to stop re-compile, re-link and re-run a target application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anil Khatri whose telephone number is 571-272-3725. The examiner can normally be reached on M-F 8:30-5:00 PM.
